OBJECTIVE

MCA candidate with a strong foundation in Computer Applications and proficiency in HTML, CSS, Java, JavaScript, and SQL. Passionate about Full-stack Web Development, seeking a challenging role in a fast paced environment to leverage technical and problem-solving skills.

EDUCATION

Master of Computer Application, Mumbai University	Expected 2025
Bachelor of Science in Information Technology, Mumbai University	2017 - 2020

SKILLS

Technical Skills	HTML, CSS, JavaScript, React.js, Node.js, SQL, MongoDB, Python, Figma, Tableau.
Soft Skills	Problem-solving, Communication, Teamwork, Multi-tasking.
Languages	English, Hindi, Marathi.

PROJECTS

GAMIFY (A game recommendation system) 2024

- Developed a web platform using React.js, Node.js, and MongoDB, increasing user engagement by 30%.
- Integrated an AI-powered recommendation engine to personalize game suggestions.
- Deployed using Vercel, optimizing backend performance with MongoDB Atlas.

AUTOBOT (IoT-based autonomous car project)2024

- Engineered an IoT-driven robotic system with Python and smart sensors for real-time object detection.
- Created an AI-based obstacle recognition model, improving detection accuracy by 90%.
- Implemented cloud connectivity for remote monitoring and control.

ACHIEVEMENTS / CERTIFICATIONS

- Ethical Hacking – NPTEL

EXTRA-CURRICULAR ACTIVITIES

- Radiant Fiesta – Event Organizer.
- Vistar Techfest – Team Lead, managed event planning and execution.

HOBBIES

- Sports
- E-sports

RESEARCH PAPER

Big Data Processing with Java: A High-Performance Perspective

- The notion of "Big Data" refers to not only the volume but also the variety and velocity at which data is produced. Processing such vast datasets demands systems that can scale horizontally while maintaining high throughput and low latency.
